

VIDIX LABOR APP

The vIDix Labor App empowers employees to submit punches, time-off requests and much more from their mobile device. Providing an employee self-service portal for your on-the-go workers anytime, anywhere.

Collect Time

Employees can clock in & out right from their mobile device. Perform labor transfers and attach activity codes to punches.

GPS Tracking & Geofencing

Map the location of where employees are working to ensure they are in the right place. GPS location is captured with punches and labor transfers.

Leave Requests

Empowering employees to submit & manage leave requests from their device, preventing last minute requests and questions.

Approve Timesheet

Employees can easily approve their timesheets on-the-go. After timesheets are approved, managers know employees have agreed to the time worked is accurate.

Attestation Screening

Upon login, employees can be prompted to answer questions. This is a perfect use for health screening or attestation.

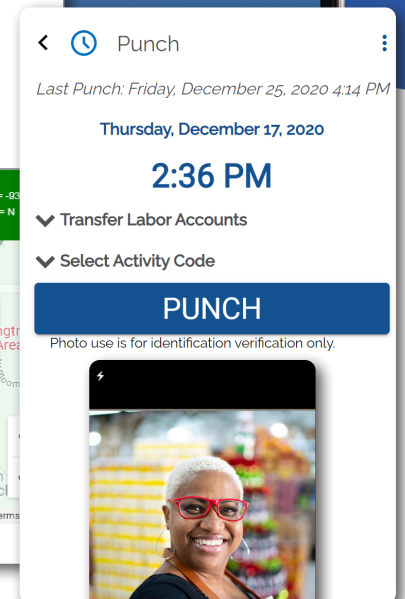

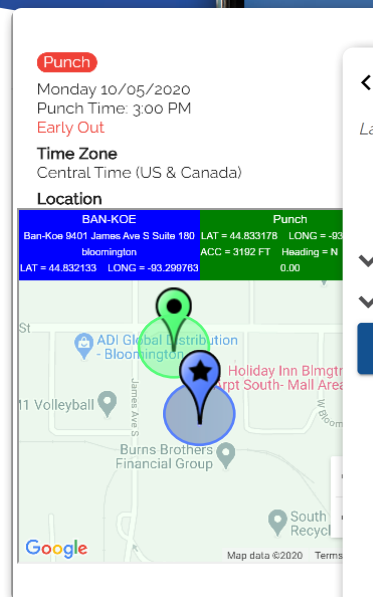

Photo Capture

Eliminate buddy punching with photo capture. Each time the employee punches they will be prompted to take a photo of themselves.

Offline Mode

Perfect for remote areas, employees can use Offline Mode to clock in & out, track hours, pay codes and make labor transfers. Once the employee is back online, information is sent to their timesheet.
